

Key Stage 3: Years 8, 9 and 10

This important stage of the curriculum provides a solid foundation for GCSE and A Level studies. It is about developing a broad base of knowledge together with the skills that will enable pupils to excel in public examinations later in their school career. During this time pupils are provided with the opportunity to study a diverse range of subjects. Our aim is that this will help our students to develop a passion for learning. We believe the curriculum should be enjoyable yet stimulating and to this end engage in various cross curricular skills projects and other educational experiences.
